

TILE ROOF ENTRY GLAND

Supersedes Tile Deck Tight

The patented Tile Roof Entry Gland has revolutionised the solar installation process. Gone are old-fashioned flashing-style deck tights.

- Save time & money
- Easier installation
- Durable EPDM rubber for water-tight seal
- Long service life

SIZE	PART NO.
M32 to Suit 25mm Conduit	CSE-REG-25

1. DRILL 32mm hole with wet diamond hole saw 	2. SQUEEZE A bead of silicon sealant around hole 	3. INSERT & LOCK With wing nut and locking nut 	4. PUSH & SEAL Insert Conduit all the way and tighten gland head
--	--	--	--

Hole location

- Bottom ¼ of tile in the middle
- Ridge. If ridge too steep, use side of valley
- Do not block valley
- Ensure gland entry point avoids other tiles and framework

Sealant

- Select compatible sealant
- Apply small bead around entry hole
- Ensure bead is continuous

Gland

- Insert gland
- Tighten locking nut to create seal

Conduit

- Insert conduit **through** gland
- Tighten gland head to seal
